

**FACT SHEET:
7700 EARHART BOULEVARD FACILITY**

T H Agriculture & Nutrition, L.L.C. (THAN), former owner of the Thompson-Hayward Chemical Company facility at 7700 Earhart Boulevard, and Elementis Chemicals Inc. (Elementis), the present owner, are proceeding with the implementation of the final clean-up program at the facility. Southern Environmental Management & Specialties Inc. (SEMS) will carry out the clean-up program and Clean Harbors Environmental Services (CHES) will provide transportation and disposal related services. Shaw Environmental, Inc. (Shaw), the engineering company that designed the remedial measures, will be performing oversight and manage all contractors and site activities.

The remedial program is the result of comprehensive studies conducted by several consultants. The program calls for impacted soils and fluids to be removed, containerized, and transported off-site to permitted waste disposal facilities. The plan also calls for a myriad of engineering controls and techniques to prevent the generation and migration of dust and vapors beyond the immediate work areas.

This work has been approved by the Louisiana Department of Environmental Quality (LDEQ). The LDEQ will monitor the implementation of the clean-up activities.

Site activities began on October 2, 2006 and will take approximately six months to implement. In summary, the primary activities to be performed will include:

- Mobilization & Site Set-up
- Demolition of the warehouse
- Erection of an enclosure structure over the first area to be remediated
- Remedial activities within the enclosure
- Off-site transportation of debris and waste material generated from the project
- Backfill and placement of offsite borrow material
- Movement of the enclosure structure to encompass other areas to be remediated
- Off-site storm drain clean-out
- Site restoration
